

PRESS RELEASE

SPRING/SUMMER 2019: ANATOMY

DEWI FASHION KNIGHTS 2018

26 October 2018

HEROES

This collection is made as a tribute to my mother's Palembang heritage. Dedicated to hard working, intelligent, strong-willed women with an inquisitive mind for the future.

DESIGN

A reimagining of 19th century Sumatran textile through our signature sci-fi perspective. The idea of interweaving is reinterpreted by dissecting and reducing the anatomy of a Songket into three modular designs in the shape of "x", "o" and "+". The three designs are combined through mathematical equations to create a new modular system of intricate interwoven patterns.

This system is applied to assemble 14 looks of futuristic-athletic silhouettes where the pieces are perforated and woven back again to reveal and hide parts of the body, reflecting the complexity of the woven arts and experimenting with its aesthetic possibilities. Each look is paired with bags designed under the same principles. Shoes by Necessity completes the look with its minimalist-luxury aesthetic.
