

RANI HATTA

SPRING/SUMMER 2020

“CONVERGENCE”

Pushing through the norm of dressing and all the restriction by stacking the soft and hard altogether throughout the collection is the key inspiration for Rani Hatta S/S 2020.

A mix of oversized silhouettes, structured tailoring, hardness quality of leather and raw denim to the delicateness of lace and pleats, all colliding forming a juxtaposition of textures.

Playing in the field of monochromatic palette with a dash of blue and metallics mimicking the fluidity of nature elements a resemblant to the waves crashing against the coastal barrier.
